

One of the biggest reasons why I am reuploading this to github is to allow people who have been denied due to their neo nazi ideas

These so called “Christians” promote nazi ideas and other racist messages. These people are not Christians, they are nazi scum who use the lord as a excuse to promote racist, sexist and homophobic ideas. Before they called me racial slurs, I am a white British man living in the UK.

**DO NOT PROMOTE OR DONATE TO THEM**

Proof of these claims:

I am NOT a developer. Yes, this cheat menu is stolen.
